

A 3x2 grid of six apples, each showing a different color variation (red, yellow, green, and combinations) to illustrate the effect of the alpha channel on color transparency. The apples are arranged in two columns and three rows. The top row shows a red apple on the left and a yellow apple on the right. The middle row shows a yellow-green apple on the left and a red-yellow apple on the right. The bottom row shows a red apple on the left and a yellow-green apple on the right. Each apple has a small green stem and a small shadow beneath it. The background is white.
